

Future of Retirement 2008

The Future of Retirement: *Investing in later life* was released globally on 13 May 2008. This fourth report examines the data collected from over 21,000 people in 25 countries and territories around the world, investigating how people prepare for what is now emerging as the 'second half of their lives'. The report reveals findings across four key themes – expectations, choice, vulnerability and inheritance.

Future of Retirement 2005

The Future of Retirement *in a World of rising life expectancies* was commissioned and undertaken between September and October 2004, a report researching global attitudes and approaches to later life. It was the largest global study ever conducted that investigated the issues that really matter to people; their hopes, dreams, priorities, aspirations and fears for later life. It also examined the ways people of different generations across the globe prepare for later life
